

Hiraoka G 3500

Hiraoka G3500 is a PVC coated fabric with a glass fibre base cloth. It has a fluorine lacquer top surface for ease of cleaning and excellent weathering resistance. The under surface has an acrylic lacquer.

The glass fibre base cloth offers several key advantages, including non combustibility, high strength and low stretch. The fabric has an excellent strength to weight ratio and is available in 16 colours. It allows the construction of large structures in a range of colours.

Property	Value
Unit Mass (gsm)	840
Thickness (mm)	0.53
Tensile Strength (N/50mm)	6360 x 5880
Elongation at break (%)	4.5 x 7.5
Fabric Width	1.03m
Tear Resistance (N)	200 x 180
F.R.	Yes, excellent
Antiwick	Yes

The above results are typical averages taken from quality assurance testing. Product profiles are subject to change without notice.
