# MONOTEC 370 Series

## SETTING THE INDUSTRY STANDARD

Developed as an "install and forget" shadecloth, Monotec 370 Series shadecloth is the perfect solution for shade sails and structures. Uniquely made using only 100% round monofilament HDPE yarns, Monotec 370 Series provides consistent protection to people and property in the harsh Australian climate.

Monotec 370 Series shadecloth is resistant to UV rays and is supported by the industry's only 15 year warranty. The sturdy fabric construction of round monofilament yarns will not stretch over time assuring colour vibrancy and the integrity of your structure's stability for many years to come.

## EXCELLENCE IN DESIGN

Monotec 370 Series is:

- ~ The only shadecloth manufactured in Australia
- ~ The only shadecloth manufactured using 100% round monofilament HDPE yarn
- ~ The only shadecloth that will retain its permanent shape and design
- ~ **The strongest shadecloth available today**

### COLOURS

## FEATURES

### 100% ROUND MONOFILAMENT HDPE YARN

With a higher strength to weight ratio, round monofilament yarn is stronger than tape yarn

### NO TAPE YARN USED

Flat and oval tape yarns are weaker and continue to stretch, causing sails to sag after installation

### NO RE-TENSIONING AFTER INSTALLATION

There is no need for installers to return after installation to re-tighten sails

### MARKET LEADER FOR STRENGTH

Exceeds Australian Standards requirements for bursting and tensile strength

### STRONG WIND RESISTANCE

Superior durability and performance especially in excessively high wind conditions

### MAINTENANCE FREE

Due to their smooth surface, round monofilament yarns are more resistant to dirt and debris build-up

### VANDAL RESISTANT

The strength of round monofilament yarn, combined with the close lock-stitch construction makes it difficult to penetrate the fabric with damaging objects

### INDUSTRY RECOGNISED

Utilised in multiple award winning projects in Australia and around the world

### 3.25MT AND 6.5MT WIDTHS

Wide widths help reduce unsightly seams, weak points and fabrication costs

### 14 VIBRANT COLOUR OPTIONS

Additional custom colours available by request

### FIRE RETARDANT CERTIFIED

Engineered to pass the industry's most stringent fire retardant tests both in Australia and around the world

### 100% AUSTRALIAN MADE

The only Australian made shadecloth available today

### 15 YEAR WARRANTY\*

The industry's only 15 year manufacturer's warranty  
\*NB: 10 year warranty on FR Series
